Erik Peteri
CS student

Currently a second year computer science student at the University of Helsinki, my enthusiasm revolves around all things tech. While my main focus is on Full Stack Development, I'm also interested in exploring areas like cybersecurity and AI. I've had experience with various technologies, and I'm good at picking up new ones quickly. Learning and growth are important to me and that's why I'm actively working on projects and exploring new skills.

WORK EXPERIENCE

Ramirent / Assistant scaffolder
2022/10 - 2022/11

- Provided crucial support to scaffolding installation teams as a Scaffolding Assistant.
- Actively contributed to tasks such as retrieving specific components, assisting in scaffold assembly, loading and unloading materials and securing loads.
- Collaborated closely with both domestic and international scaffolding teams, emphasizing precision, teamwork and meticulous attention to detail for seamless scaffold project execution.

Specsavers Rovaniemi / Retail Assistant
2019 (June, September)

- Held positions as both a summer employee and temporary fill-in.
- Managed various tasks within the store, focusing on eyewear cleanliness and processing customer orders.
- Prepared and packaged glasses, and communicated with clients through text notifications.
- Actively engaged in customer service, interacting with patrons and addressing their needs.
- Highlight: Conducted retinal imaging for customers, including capturing images for military personnel.
